Important information

All accessory prices are for factory installation. Subsequent installations are subject to additional costs. Any change to the factory settings of your vehicle can lead to impairment of driving or road safety. The accessories recommended by us, and original spare parts have been specially developed for your vehicle. Accessories, fixtures, converted parts or built-in parts that have not been approved by LMC can cause damage to the vehicle and impair road safety. Even if there is an expert appraisal for the part at hand, a general operating licence for parts, or type-approval, there is no presumption of the proper condition of the product. Please understand that no liability can be assumed for damages caused by products that have not been approved by LMC, or caused by unauthorised modifications.

The dimensions in roadworthy order** correspond with series design without optional extras. Installation of optional extras increase the dimensions of the motorised caravan in roadworthy condition***, and the cargo load is reduced correspondingly***. Please take the weight of the optional extra into account with regard to the cargo load***.

Changes to prices, technical data, fixtures and furnishings, as well those regarding creative aspects, remain reserved. Information about scope of delivery, appearance and services, correspond to the information available at the time of printing. Deviations of +/- 5% are possible in measurement and weight data (measurements in running order). The cargo load*** derived there from can vary correspondingly. Our weight information complies with requirements of EU-guideline 661/2009 and VO (EU) 1230/2012.

* The indicated number of persons is dependent on weight and axle load. It may be reduced through installation of accessories and optional extras. The indicated number of persons refers to the vehicle weight in series production condition. It represents the maximum permissible number of persons that can have a seat during the drive. Depending on the model, this is only attainable by payload weight. The technically permissible total mass as well as axle loads must not be exceeded.

** This weight includes the driver's weight (75kg) and following mass of the vehicle with standard equipment according to manufacturer's specifications: Liquids such as fuel and AdBlue (90%), fresh water (10l/20l), gas (1x 11kg + approx. 5kg bottle weight) at 100%, plus tools, tyre repair set and cable reel, without optional extras. This corresponds to a weight of approx. 191kg to max. 212kg.

*** The cargo load must not be exceeded by the number of passengers, their personal equipment and optional extras.

Footnotes

- 1) Only in combination with comfort seat covers. Special equipment: Heated seats.
- 2) Find more information about LLT in our catalogue or at www.lmc-caravan.de.
- 3) Only available in combination with second gas canister. The gas canister has an additional weight of 16kg. Special equipment CPU with gas switch-over system and DuoControl with Crash Sensor.
- 4) No tent light above the body door. Special equipment awning with LED lighting.

- 6) Only in combination with the pop-up roof. Button-on insulating mat in the pop-up roof. Not available in combination with hot water heating.
- 7) Eco-pack with 140 PS in combination with automatic transmission is mandatory. Special equipment automatic transmission.
- 8) With roof elements ensure that there is limited space for the mounting.

Depicted decorations are also not part of the scope of delivery. All information corresponds to the current status at the time of printing. We reserve the right to technical modification of the construction and outfitting, deviations to the colour, or mistakes, colour deviations are partially print or lighting related. Some illustrations include optional extras subject to extra cost. All prices are recommended retail prices in Euros, incl. statutory value added tax ex works LMC. The validity of all previously published price lists expires with the publication of this price list.

Valid from 01/08/2020.
